

Results of the Italian History Competition 2007/2008

The topic of the fifth edition of the Italian History competition was 'Places of memory of yesterday and today'. Within this competition, the Fondazione per la Scuola received 21 research projects from 21 secondary schools all over Italy for a total of 403 students involved.

The most particular aspect of this competition round is that even if the topic was quite general and gave the possibility to choose many different subtopics, almost all the projects were about the places of the Second World War memory.
